

## Complete Project Lifecycle Engineering Services for the Energy Market.

With over 30 years of expertise in the energy sector, AED Energy Services stands as a trusted leader serving various segments including renewables, liquid petroleum, natural gas, specialty gas, utilities, and renewables. Renowned for our comprehensive suite of services and end-to-end project solutions, we have earned the trust of long-standing clients within the industry. Our knowledgeable staff, equipped with extensive industry experience, ensures the success of projects across the Continental US.

### FULL SERVICE EPCM SERVICES

- Comprehensive Engineering Disciplines
- Expert Project Management
- Efficient Construction Management
- Reliable Procurement Services
- Robust Project Controls
- Accurate Estimating Solutions
- Effective Planning Strategies
- Proficient 3D CAD Capabilities

### COMMISSION AND START-UP EXPERTISE

- Preparation & planning
- Mechanical completion and integrity checks
- Pre-commissioning & commissioning
- Operational testing
- Start-up & initial operation
- Performance/acceptance testing
- Post-commissioning services

### PROJECT EXPERIENCE

#### ExxonMobil PAPL/BIPL Expansion | 149-mile segment

Hearne and Irving, TX

- PLC and SCADA programming for pipeline expansion projects of six facilities.
- Engineering services included civil, structural, and piping designs for valve sites, trap connections, and flow control and measurement assets.

#### Energy Transfer Corsicana Pump Station

Mayersville, MS

- Comprehensive services from programming to commissioning for a conversion from solid state equipment to new electronic relays.

#### EMPCO Pasadena Magellan Project

Pasadena, TX

- PLC and SCADA programming to interface with existing equipment and third party facilities for a \$10 million pipeline connection, facilitating the movement of gasoline and distillate products.

#### Headquarters Office:

205 West Welsh Drive | Douglassville, PA 19518 | 610.385.8200
