Your Trusted Inspection and Technical Services Partner in Critical Industries

CATSI specializes in providing high-quality services for refinery, pipeline, chemical, and power industry projects worldwide. With over four decades of field experience, we offer expertise in mechanical integrity, process safety management, new construction, pre-turnaround support, and turnaround inspection and project management. When you choose CATSI as your partner, you access a team deeply familiar with the nuances of your industry, delivering solutions that are not only effective but also efficient.

Our global presence includes district offices in Chicago, Philadelphia, Pittsburgh, and Houston, with a dedicated team of technical and inspection personnel. Committed to quality, stability, and safety, our outstanding reputation is built on a history of exemplary service. Over half of our staff has an average tenure of 12+ years.

Safety Is at the Forefront of Everything We Do

CATSI prioritizes the safety and health of employees, adhering to customer site-specific safety standards and implementing CATSI safety programs, including OSHA 10/30 Hour training. We possess an active talent database and effective recruiting techniques to promptly fill positions with experienced inspectors, aligning with turnaround schedules.
